

Filter oil for foam filters

Description:

Eurol[®] Filter Oil is formulated from high quality base oils and especially selected solvents and additives, making this product suitable for foam filters of all brands, ensuring a free air supply without blocking.

Eurol[®] Filter Oil is successfully applied in foam filters of cross, touring and off-road motorcycles, as well as in GO-Karts and cross cars. The high quality of the product is long-lasting.

Eurol[®] Filter Oil will not drop-out in the filter. It offers a total protection against water, dust, sand and dirt, but allows a free air supply to the carburettor. Because of the blue colour, the covering of the filter by the fluid can be checked easily. It is recommended to air-dry the soaked filter, after application of the product.

Eurol[®] Filter Oil is water resistant and will not be washed out by rain or spray water when cleaning the bike. Eurol[®] Filter Oil can be removed with Eurol[®] Filter Cleaner.
